Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 10, 11, 14, and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Mura-Smith (U.S. 6127945A).

With respect to claim 10, the U.S. reference No. '945A to Mura-Smith has been cited as teaching a portable hand-held unit (10), which is in communication with a base (28) (Mura-Smith, figure 3) in order to receive the map data that represent the position of a user of unit (10) and a selected location that covers the position of said user (Mura-Smith, column 3, lines 54-62). As illustrated by Mura-Smith, the portable unit (10) determines the position information of the portable unit (10), and generates new position information whenever the portable unit moves to another position (Mura-Smith, column 8, lines 4-8).

With regard to claim 11, Mura-Smith disclose that the display screen (12) (Mura-Smith, figure 8B, display screen 12) shows the four different direction indicators: north,

south, east, and west indicators (66a-66d). And said that the display is aligned with a moving direction of the portable unit (Mura-Smith, column 8, lines 29-43).

With regard to claim 14, Mura-Smith teaches that the communication between the portable unit (10) and the base (28) is established in compliance with the RF-based communication link (Mura-Smith, column 6, lines 50-51).

With regard to claim 15, Mura-Smith discloses that the antenna (22) of the portable unit (10) is for detecting the radio signal (Mura-Smith, column 4, lines 4 and 5).

Allowable Subject Matter

During the prior art searching, the examiner has recognized that none of the references of record teaches or fairly suggests a system and method for displaying a map in a display unit of a mobile terminal comprising a transmitter for transmitting map data representing a map of and around the first region to the mobile terminal device when the terminal detector detects that the mobile terminal device exists in the first region; a receiver for receiving the map data from the transmitter; and a controller for causing the display unit to display the map based on the map data received by the transceiver such that a top of the map is aligned with a top of the display unit.

According that, claims 1-9 and 16-32 are allowable.

Addition, none of the references has been found teaches the limitation as claimed in claims 12 and 13, therefore, claims 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3663

Conclusions

The prior art made of record, which are listed in PTO-892, and not relied upon are considered pertinent to applicant's disclosure includes the following: Bork et al.'s, Yoshida's, Alanara's, Nitta's, and Trompower's.
